

HEALTHINEERS IMPROVE R&D

September 2020

DGX
SECURITY

The Customer

Healthineers are engineers that create new solutions or services to improve instruments, research & development, and overall healthcare.

The Challenge

Client was wasting money purchasing off-the-shelf systems that were not performing as needed.

The Outcome

Healthineers can now analyze performance at all its multiple research facilities using video to improve instruments. DGX Security created this customized design solution using Axis Communications F41 Camera Stations, F1025 Sensors & T5804 PoE Switches Hardware and WDR Software.

DGX & AXIS

DGX helped research engineers improve the way instruments perform using IP Cameras from Axis Communications. We can help your organization improve your day to day operations, no matter the job or role.
